NEWSPAPERS IN EDUCATION

Newspaper In Education

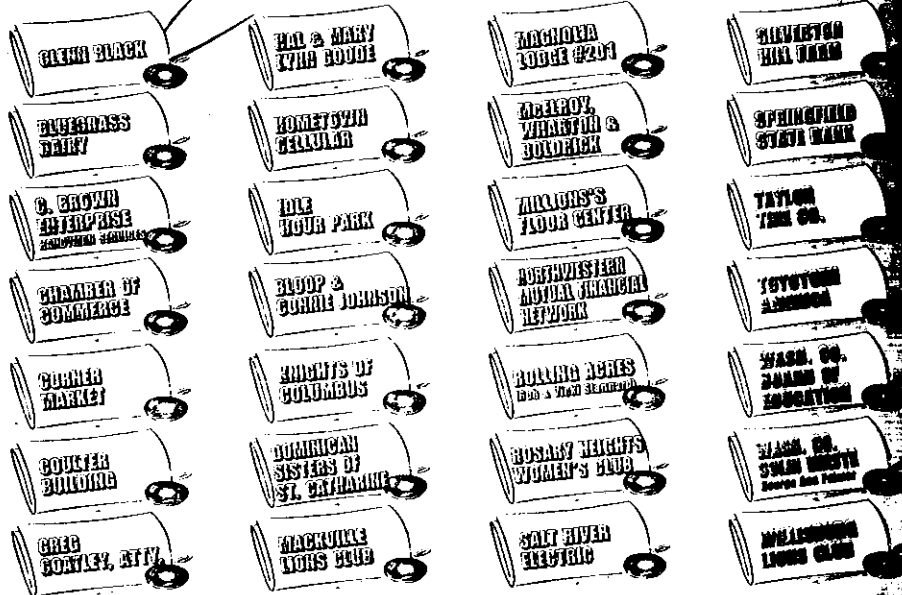

NIE stands for Newspapers In Education. It's a program promoting the use of newspapers in the classroom as an important, up-to-date teaching tool.

Newspapers can be used as a great teaching tool of information in history, science and current events. Plus, studying the paper will enhance reading skills.

It's important for our children to learn about the history of the world, but also to be going on today and the technologies of tomorrow.

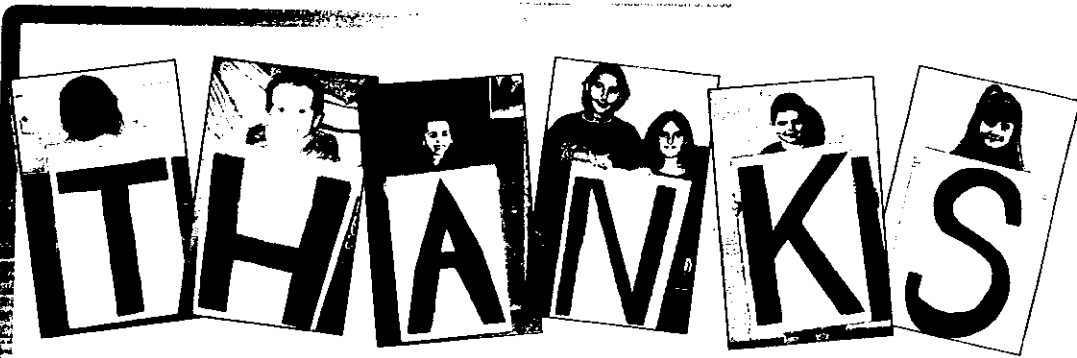

To be a part of this program for the next year, call Renee at (859) 336-3716 for more information.
